About SAL Logistics Services

The National Logistics Champion Connecting the Kingdom to the World

Who We Are

SAL is the national logistics champion providing cargo handling, logistics, and supply chain services across the Kingdom of Saudi Arabia. Delivering innovative, efficient, and integrated solutions to its customers. Established in 2019 after separating from Saudia Cargo, SAL entered a new phase as an independent national company contributing to the development of the Kingdom's logistics sector.

SAL operates an extensive network of 20 domestic stations across the Kingdom's airports, in addition to its first international station at Liège Airport in Belgium. The company serves airlines, freight forwarders, and public- and private-sector clients, supported by advanced capabilities connecting air, land, and sea freight to enhance supply chain efficiency and facilitate the seamless movement of cargo locally and internationally.

Our Vision

To be the logistics champion for a nation that connects the world.

Our Mission

To deliver world-class logistics solutions and create sustainable value for all our customers and partners through continuous development, our national talent, strategic partnerships, and advanced technology solutions.

Reflecting the scale of operations and intensity of activity.

The National Logistics Champion

Connecting the World through the Kingdom

SAL Business Sectors

- **SAL Ground Handling:**
  The core driver of the company's business and operations. It is built on high operational efficiency and strategic partnerships with airlines, ensuring the smooth flow of cargo through the Kingdom's gateways while supporting sustainable growth and expansion across various business sectors.

- **SAL Logistics:**
  The growth engine that expands the company's presence beyond airports through integrated supply chain solutions covering transportation, warehousing, freight, value-added services, and specialized logistics solutions for major projects, in addition to integrated solutions for the sports, entertainment, culture, and arts sectors.

- **SAL Zones:**
  An integrated ecosystem of logistics zones that combines advanced infrastructure with operational and digital solutions to enable trade movement and support business growth. Through strategic projects, most notably SAL Logistics Zone in Mulham, which spans more than 1.5 million square meters, SAL continues to develop logistics environments that improve supply chain efficiency and enhance the Kingdom's global competitiveness.
